

## GREEN LEAN WASTE SOLUTIONS OFFERING ECO-COACHING FOR HOMES AND OFFICES

Green Lean Waste Solutions is a solid waste management consulting firm and specializes in custom waste and recycling management programs designed to reduce the client's costs up to 50% ([www.greenleanwastesolutions.com](http://www.greenleanwastesolutions.com)). Many people have asked if they offer any "green" services for the home owner or office. Green Lean Waste Solutions is pleased to announce that they are now an independent authorized agent for Green Irene and the Green Irene Eco-Consultant for the Eastern Shore/AA County area and authorized product dealer. Their services will help families and small offices implement proven green solutions and help lead them to a healthier, safer, and more sustainable lifestyle, along with saving them money!

Services Now Available Include:

**Green Home Makeover** - The main service offered is a 60-to 90-minute Green Home Makeover. The steps recommended and the products offered, as well as referrals to specialists, can help save you energy and water. They can also help improve your indoor air quality, remove toxic chemicals from your home, reduce the waste you generate (which ends up in landfills) and improve the purity of the water your family drinks. By doing an inventory of your wasteful incandescent lighting, they can also show you how to save \$1,000s on your electric bill. After they have finished the consultation, they will show you tips and products to make your home healthier.

**Green Office Makeover** - Available for small businesses up to 50 employees to help them adopt and implement green practices. The tools and solutions they can show businesses will not only help them take their first steps to going green, but also show how to successfully reduce costs and waste. Offices will be presented with a set of recommendations and concrete steps in areas like energy conservation, creating a toxic-free workplace, green purchasing strategies and sustainable travel and transportation.

**Go Green Workshop!** - These workshops can be held at someone's home, church, home owners meeting, civic club, etc. Guests can come learn about green topics, tips and advice about how to make your environment and lifestyle healthier and more sustainable!

**Fundraisers** - There will also be select products for schools, churches, etc. who wish to have a GREEN fundraiser this year instead of the traditional candy, cookies, etc.

You are welcome to visit the website <http://www.greenleanwastesolutions.com/2215.html> where you can find more information about the consulting services. To view products offered in the product catalog, please follow the link under Eco Coaching and click the "shop now" button. Also - check out the affiliate partners on the "Green Your World" tab for a complete line of eco friendly pet and marine products.

Brittingham*

### *Welcome to Spring!!!*

We just completed our Annual Gala for our county's educators. The Teacher of the Year, Debbie Mason who is a 1st grade teacher at Centreville Elementary School and the Bus Driver of the Year among many others are also recognized at this annual event. The Educators' Gala is sponsored by the Queen Anne's County Chamber of Commerce and their members, the Queen Anne's County Teachers' Association, and local businesses; we had more than 200 in attendance.

In addition to the Gala, we also held our Annual Spring Breakfast with our elected officials. Corsica Hills graciously hosted this event. We had many interesting and excellent speakers: Senator Pipkin, Delegate Sossi, and Commissioner Paul Gunther. The session went into overtime to accommodate all the information our speakers shared with us. I would like to express our many thanks to them for their enthusiasm.

Please remember to sign up for our "Spring Fling Golf Tournament" which will be held at Hunters Oak on Friday the 8th of May. Sponsorships are still available for this upcoming event.

Our next Mixer takes place at Britland Estate near Chestertown in conjunction with the Kent County Chamber of Commerce. This should prove to be very interesting and fits in well with our networking objective to work with other groups on the Eastern Shore and around the world. I am looking forward to seeing you there on Wednesday May 13th.
